OPENING OF CIRCUIT COURT AT HARDINSBURG.
A Big Day and the Town Running Over With People.
A FEW CANDIDATES PRESENT.
Last Monday was a grand all around day at Hardinsburg. Circuit Court opened in the forenoon with Hon. T. R. McBeath on the bench and the Hon. C. R. Wathen the acting prosecuting attorney. But little business was transacted in the morning, the formation of the grand jury, and the usual charge to them by the district Attorney consuming, all of the time up to noon. The first day of a Circuit Court is never a day for transacting of much legal business. Every-body that can get to the County Seat go there on the first day of Court, as much out of a matter of custom and to meet and mingle with the crowd as any thing else.
Last Monday was an exceptionally fine day, the beginning apparently of actual spring weather, and the turn out at the

Be sure to call at the Cash Store Friday and Saturday, May 8th, and 9th, and buy you a suit of clothing, from a wholesale merchant that will be there, you will save money by buying your clothing on the new plan adopted by the Cash Store.

Wholesale merchant to meet the people at the Cash store, Bewleyville, Ky., Friday and Saturday, May 8th and 9th, 1891.

Mr. Bosely representing one of the largest wholesale houses in Louisville will be at the Cash store on the above dates with a full line of men's and boys' clothing. You will then have an opportunity to make your own selection from this large stock, which carries all grades from the cheapest cottonade to the finest cassimeres that is handled by the wholesale trade.

This is a new idea in handling clothing and the nearest possible approach that a retailer can make to wholesale rates. In selling in this way I will have no capital invested and no stock to carry over from season to season as all that I buy will be sold before I buy it, all mistakes will be taken back and returned to the wholesaler without expense to the buyer. As this is an experiment that will be greatly to the advantage of the consumer you ought to encourage it by giving it a big send off on this, it's first trial.

Come and see whether you buy or not. If you want a new suit it will pay you big for a lost day and a ride of fifteen or twenty miles.

Round the World in Eighty Days.
The first of the new vessels of the Canadian Pacific line, built to establish communication between Vancouver and Japan, has left Liverpool for Vancouver, and she takes with her a number of passengers at an inclusive charge of \$120 for an all-round-the-globe trip. The vessel is a magnificent specimen of the skill of the English shipbuilder. Her complement of passengers is full, and these glorified trippers are bound to be back in England within eighty days after their departure from Liverpool. They will go by way of the Suez canal and the Indian and Pacific oceans, and will cross Canada on the Canadian Pacific line.—London Tit-Bits

A Daring Project.

One of the features of the coming electrical exhibition at Frankfort-on-the-Main will be the transmission of power on a scale hitherto never attempted. When it was announced some months ago that it was proposed to transmit 100 horse power from Lanfien-on-the-Niecher to Frankfort, a distance of more than one hundred miles, the statement was received with smiles of incredulity, but now it seems quite probable that not only will the experiment be tried, but that it will succeed, in spite of the engineering difficulties that have to be surmounted.

The government has been asked to supply line for the purpose, and on the system used the expense will not necessarily be as all severe, for the use of very high potential alternating currents is the feature of the scheme as at present planned. The alternating generator will supply a step-up transformer, that in turn will transmit its secondary current at an enormously high potential along the line, to be re-transformed by a step-down transformer at Frankfort to a potential practicable for an alternating motor. A series of experiments carried out recently at Berlin involve the use of pressures as high as 35,000 volts on the line. At such a potential the current transmitted becomes so small that the line is a relatively small factor in the losses incurred, even though it be of the extreme length proposed. Nothing can better illustrate the characteristic advantages of the alternating system than this beautiful process of generating and utilizing currents at a moderate potential and transmitting them from station to station at a pressure so enormous that the losses in transit become insignificant. —Electrical World.

One Maine Boy.

The son of Mr. Alvin Howes, of Palmyra, is considered about the smartest boy in this section. He is 9 years old and is master of Greenleaf's Complete Arithmetic, having interest, equation of payments, mensuration, square root, cube root, etc., at his tongue's end. He will perform calculations with large numbers readily without slate or pencil, and rarely, if ever, make a mistake. With him a thing once learned is never forgotten. He began to learn geography when he was 3 years old by bearing his brother reciting his lessons to his mother, and now it is next to an impossibility to ask him a question in that study that he cannot readily answer.

He has a better knowledge of physiology than most teachers possess, and withal is quite a politician, being better posted on the events of the day than many who go to the polls and vote. He has not been drilled at home to show off; he has only been assisted when he called for help. He is a well developed, healthy looking child of modest and pleasing manners.—Hartland Cor. Pittsfield (Me.) Advertiser.

The Press Gang to Visit Paducah.

The News has been awaiting a meeting of the executive committee to state that on the 4th of June the Kentucky Press Association would meet in Paducah and be in session two days. This will be an unusual gathering and one which will merit and should, and will, receive the fullest recognition and the heartiest of greetings. It will be the assemblage of representatives from all parts of the state of bona fide newspaper men, and will introduce Paducah to the eyes and hearts of a class who can and will advertise the place as never before in its life. But in time the News will have more to say of the coming of the press gang and the welcome the people will give them.—Paducah News.
